Interior and exterior waterborne natural resin based plaster primer and wall finish.

INGREDIENTS

Water, Linseed oil, Sunflower oil, Casein, Borates, Cellulose ether, Calcium carbonate, Kaolin, Pigments of natural occurrence or non-toxic mineral pigments, Essential oils Note: Natural products are not odour and emission free. Consider possible allergies!
TVOC (total volatile organic content) = 0.987 g/litre

COLOUR

Milky; dries to clear film. Also available in white

AREA OF USE

Water-based emulsion for the pre-treatment of very absorbent or unevenly absorbing mineral substrates (plaster, concrete etc.) and organic substrates (wall paper, wood, rhino board etc.) as well as additional protection against staining and soiling over **ProNature Wall** substrates or clay walls, crete stone, etc. For the priming of very absorbent surfaces before **ProNature Wall** is applied.

COVERAGE

Approximately 20 m²/litre for the clear and approx.10 m²/litre for the white variety; depending on absorbency of substrate.

SURFACE PREPARATION

Wood should be finely sanded and all surfaces must be clean, dust- and oil free. Care must also be taken to provide a neutral surface. Therefore, it is recommended to pre-treat mineral surfaces with an acid wash (follow supplier instructions!). As a natural acid wash simply use some vinegar or citric acid (15%) dissolved in water. Rinse acid washed surfaces well and leave to dry. Fill holes and cracks with a suitable material before **ProNature Plaster Primer** is applied.

APPLICATION

ProNature Plaster Primer is ready for use.

The plaster primer can be applied by brush, roller, foam pad or suitable spraying equipment.

Allow 12- 24 hours drying time (depending on ambient temperatures) between coats or before over-coating with **ProNature Wall**.

ProNature Plaster Primer fully dries within 12 -14 hours and reaches its final maturity after about 4 weeks.

Clean tools with water. For partially dried product assist water cleaning with **ProNature Plant Soap**

STORAGE/SHELF LIFE

The product can be kept for a minimum of 4 months in unopened containers when stored in a cool and frost-free place. Product does not contain chemical preservatives and hence might be subject to micro bacterial decomposition. Once opened product has a limited shelf life and preferably should be used immediately. Do not use material if it has an unpleasant smell or shows signs of a micro bacterial attack i.e. mould.

PACKAGE SIZES

1l, 5l, 20l

General

The above information given is intended as a guideline only. Since this product is used outside of our control, EnviroTouch CC cannot be held liable for any loss or damage whatsoever relating to the application or surface it is applied to.
