#### INGREDIENTS

Water, Potassium soaps, Fruit acids, Mineral Acids

Note: Natural products are not odour and emission free. Consider possible allergies!

#### AREAS OF USE

For the cleaning and restoring of weathered (grey) Wood.

#### SURFACE PREPARATION

Clean surface of loose dirt, algae etc. by scrubbing with a stiff bristle brush.

#### CONSUMPTION

Depending on the state of ageing of the wood approx. 10 - 15 m<sup>2</sup>/litre, on non-porous, flat substrate.

#### APPLICATION

Moisten wood. Using a sponge or cloth apply liberal amounts **ProNature Wood Cleaner**. Allow the cleaner to draw in for about 2-3 minutes before scrubbing in direction of the wood grain using a stiff short-bristle brush or scrubbing pad. Thoroughly rinse wood with clean water, easily done using a jet of water from a hosepipe.

Severely dirty or weathered wood may require a second treatment until wood shows its natural colour and grain.

If sanding is required this should be done before application of **ProNature Wood Reviver**.

Allow the wood to dry lightly before applying a liberal amount of ProNature Wood Reviver using a brush or sponge (the use of rubber gloves is recommended). Leave to penetrate for at least 5 minutes and then rinse thoroughly with clean water. This will restore the original wood colour.

Clean tools with water.

Note: Immediately rinse off spills from surfaces not treated.

For proper protection coat the wood using **ProNature Outdoor**. See separate leaflet.

**ProNature Wood Cleaner** is also suitable for the cleaning of oiled and waxed surfaces i.e. finished with ProNature Floor or ProNature Wax Balm etc.

For cleaning of wooden floors dilute **ProNature Wood Cleaner** 1:5 with water. If dirt is very stubborn used undiluted.

#### STORAGE

Store in a cool and frost-free place.

#### PACKAGE SIZES

0,5l, 1l, 5l, or as Wood Set which contains 200 ml **ProNature Wood Cleaner**, 200 ml **ProNature Reviver** + scrubbing pad + instructions.
