

## Technical Data Sheet

### Product Description:

ProNature Mould Stop effectively kills mould and mould spores (mycotoxines) as well as bacteria on contact. It preserves the substrate within minutes and prevents re-infestation. It can be used in all areas with mould infestation, including kitchen and bathrooms.

### Ingredients:

Water, citric acid, hydrogen peroxide, alcohol, sugar surfactant

### Coverage:

Approximately 9 – 14 m<sup>2</sup>/litre, depending on the substrate.

### Application:

ProNature Mould Stop is ready to use. Do not dilute.

- ✓ Simply spray ProNature Mould Stop directly onto affected area.
  - ✓ Leave for a minimum of 60 minutes, depending on infestation.
  - ✓ Wipe off residual mould and rinse with clean water. Severely infested areas may require multiple treatment .
- Please test surface compatibility prior to use.

### Cleaning:

Clean tools with water immediately after use.

### Storage / Shelf Life:

The product can be kept for a minimum of 24 months in unopened containers when stored in a cool (but frost-free) and dry place.

### Package Sizes:

750ml (spray), 1l (refill), 5l (refill)

### Disposal:

Please recycle container and reuse pump.

### Caution & Safety:

Keep ProNature Mould Stop away from children.  
Wear a dust mask to avoid breathing in mould and spores.  
Wear gloves to avoid skin contact.  
After contact with skin, wash immediately with plenty of water.  
Avoid eye contact.  
When swallowed seek immediate medical attention and show product label to medical practitioner.

### General:

The above information given is intended as a guideline only. Since this product is used outside of our control, ProNature cannot be held liable for any loss or damage whatsoever relating to the application or surface it is applied to. We reserve the right to change specifications at any time and without prior notice.
