NATURAL, PENETRATING,
OIL-BASED
FLOOR-SEALING SOLUTIONS**

ProNature Indoor for Wooden Floors

Times of painted, cerused and high gloss woods are a thing of the past.

ProNature Indoor - a blend of plant oils to protect, impregnate and optionally tint timber, preserving the beauty of your wood, naturally.

Clear sealers enhance the original timber colour. Pine & Oak and many other types of wood tend to darken and yellow quite substantially.

To counter-act this and preserve the freshly sanded look ProNature created the solution: opt for either "Natural Light" or "Splash of White" as an "invisible" sealer.

Here are some of the many benefits:

- Easy application
- Only 6 hours between coats
- Accessible only 12 hours after application (but give it about 7 days to fully cure and avoid moving furniture around, standing water and wet cleaning)
- Maintenance. Clean and re-apply one coat if required. No sanding required! So your engineered wooden flooring can last you for decades!
- AND: the floors can be spot repaired! Wooden floors in a busy family home – stains or scratches will not be avoidable. So being able to fix those flaws is a treat on its own!

Preserve the freshly sanded look with
ProNature Indoor "Splash of White"

ProNature Rock for cementitious flooring

ProNature Rock is a specially formulated, oil-based, penetrating quality stone sealer giving long lasting protection on all interior and exterior, stonework, terra cotta tiles, clay & lime plaster, slate and face brick.

Recently we sealed Crete & Walls Creations' Coloured Overlay, a cementitious floor.

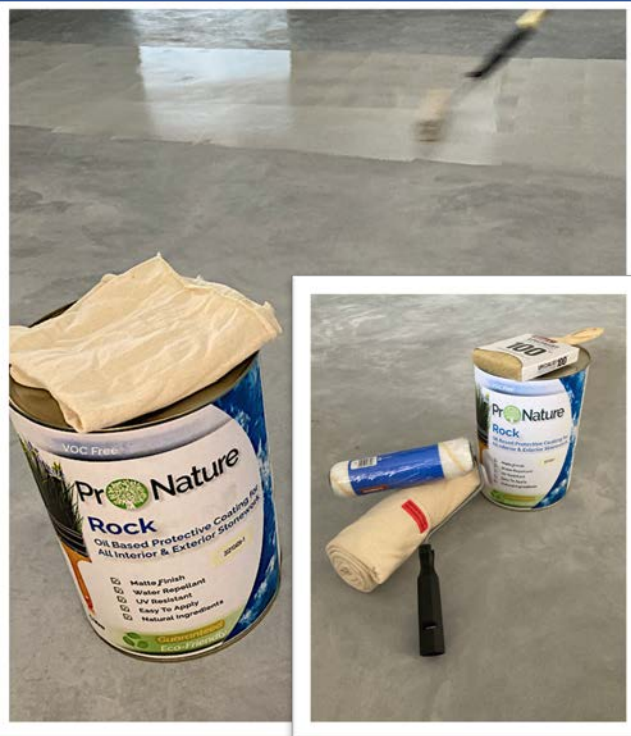

Why ProNature Rock was the first choice:

- Easy application
- Plant-based finish without potent odours
- Only 6 hours between coats
- Accessible after 12 hours (give it about 7 days to fully cure)
- Product can be tinted – we chose to add white pigmentation to avoid darkening of the light grey mottled look.
- The finish is beautifully matte, smooth and non-slip (toddlers, the elderly and even dogs enjoy this, too!)
- The floor can be spot repaired!
Let's be real! : Especially in high traffic areas like kitchen, dining room and passage in a busy family home stains or scratches will not be avoidable. Being able to repair the floors was considered as an essential by the client.

ProNature Rock, tinted "Splash of White"
on cementitious overlay "Gorgeous in Grey"

Let's paint a greener future!

TIP:
ProNature's range include Cleaners, which treat you stone or timber surface while getting rid of all bacteria & dirt.

ProNature's products are plant-based, sustainable, free of petro-chemicals, synthetic and harmful ingredients.

*Safe for the earth, safe for you and your family.
Yes, you can breathe easy, naturally!*
